Nursery & Garden Industry
Queensland

Nursery AgChem user Workshop & Chem Certificate

Become certified in the preparation, application, transport and storage of agricultural chemicals in production nurseries.

This **two-day** workshop has been designed specifically for people working in our industry and will allow you to achieve the national units of competency, required for sprayers working in nurseries under Queensland WHS law;

AHCCHM304 – Transport & Store Chemicals

AHCCHM307 – Prepare & Apply Chemicals to control pests, weeds and disease

Completion of these two units provides evidence that the participant has the skills to safely mix and apply ag-chemicals as part of their job. The course has been extended to two days to ensure everyone participating achieves the necessary level of competency, even if they are new to the industry. It is not designed as a refresher course for those already performing these tasks.

Fulfil your duty of care under Workplace Health & Safety, learning about

- Legal requirements in regard to chemicals
- Chemical labels and SDS
- Efficient means of chemical application
- Calibration & maintenance of chemical spraying equipment

This competency-based training will be delivered by a qualified trainer with experience in the Nursery & Garden Industry. Online enrolment plus language, literacy and numeracy short assessment to be completed prior to course, approx. 30 minutes.

Enrol early to secure your place – return form to NGIQ to register participation.

Please email a copy of the Chemical Register (Pesticides) from your workplace with your enrolment form and LLN. Why? Because learning about the chemicals used and stored in your workplace makes the training more specific, relevant and memorable for you! Plus have photos (5) taken of you at work performing tasks to help you satisfy the assessment criteria.

Immediate payment is required to reserve your booking.
